PROJECTS

Smart Vendor Book Bank System (SVBBS) | Live Demo | GitHub

Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Gemini API, Groq, Vitest, GitHub Actions

- Engineered a production-grade **MERN stack** platform with 7 role-based dashboards and 80+ REST API endpoints; secured every route with JWT authentication, refresh-token rotation, CSRF protection, and RBAC, deployed on Vercel and Render with automated CI/CD.
- Designed a multi-provider AI layer using the **Strategy design pattern** with cascading failover (Gemini → Groq), keeping 10+ AI features (semantic search, recommendation engine) available through provider rate-limits.
- Authored a 141-test Vitest suite in GitHub Actions with code-coverage gating and dependency audits per commit; **test-driven development (TDD)** caught critical data-integrity defects pre-deployment.

Tasty Kitchens (React Food Delivery Platform) | Live Demo | GitHub

Tech Stack: React.js, JavaScript, REST APIs, JWT Authentication, React Router DOM, Local Storage

- Built a responsive food delivery application with React.js, **JWT**-secured private routes, and session management, integrating REST APIs for a complete browse-to-cart-to-order flow.
- Implemented Search, Sort, Filter, and Pagination across 50+ restaurants, with a persistent cart via Local Storage and explicit API state handling (Loading/Success/Failure) for a fast, failure-tolerant UI.

Interactive 3D Developer Portfolio | Live Demo | GitHub

Tech Stack: React.js, Three.js (React Three Fiber), Framer Motion, Vercel Serverless Functions, Gemini API, Groq

- Developed an interactive 3D portfolio with **Three.js** (React Three Fiber) and Framer Motion — light/dark theming, mobile-first design, and device-based particle scaling for smooth 3D rendering on low-end devices.
- Shipped an **AI chat assistant** on Vercel Serverless Functions with multi-provider LLM fallback, isolating credentials in environment variables and auto-deploying via CI/CD on every Git push.

TECHNICAL SKILLS

Frontend: React.js, React Hooks, React Router DOM, Context API, JavaScript (ES6+), HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT Authentication, bcrypt, Middleware Architecture

Databases: MongoDB, SQL, SQLite (Indexing, Query Optimization)

UI & Styling: Tailwind CSS, Styled Components, Bootstrap, Flexbox, Responsive Design, Recharts

Testing & CI/CD: Vitest, Test-Driven Development (TDD), GitHub Actions, Code-Coverage Gating

Tools & Cloud: Git, GitHub, Vite, Postman, Vercel, Render, Command Line (CLI), VS Code

EXPERIENCE

NxtWave – CCBP 4.0 Academy

2025 – 2026

Full Stack Developer

Remote, India

- Built and deployed 3 full-stack applications during the intensive 6-month program: a food delivery platform (React.js, JWT), a social media REST backend with 15+ endpoints (Node.js, Express.js), and a GitHub analytics dashboard (React.js, Recharts).

EDUCATION

Nehru Institute Of Engineering And Technology

Nov 2021 – May 2025

B.Tech in Artificial Intelligence and Data Science

CGPA: 8.1/10.0

- Coursework:** Data Structures & Algorithms (DSA), DBMS, Operating Systems, Computer Networks, Python, Machine Learning

CERTIFICATIONS & ACHIEVEMENTS

Business English Certificate (BEC): Secured Grade A from Cambridge University

Machine Learning (NPTEL): Earned certification with Elite distinction

AICTE EduSkills Virtual Internship: Completed AI-ML Virtual Internship program
